RESPOND

Easy to understand Monitoring and Alerting Mechanism

- ✔ Integrate with existing security systems
- ✔ Plug-and-Play
- ✔ Non-intrusive
- ✔ OS Independent
- ✔ Data retention - Analyze suspicious traffic up 12 months
- ✔ Forensic security tool for GDPR Regulations
- ✔ Scalable due to the use of NetFlow, Ipfix

WHY REDSOCKS?

RedSocks is a Dutch company that specializes in malware detection. RedSocks provides the RedSocks Malware Threat Defender as a network appliance. This innovative appliance analyzes digital traffic flows in real-time based on lists of malicious indicators and algorithms compiled by the RedSocks Malware Intelligence Team. The team consists of specialists whose job it is to identify new threats on the Internet and translate them into state-of-the-art malware detection.
